                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        tissue. The isoform B is expressed in a relatively large the adult brain comparatively to fetal brain. PMW: Ligand-mediated auto-phosphorylation.
SIMILARITY: Belongs to the Tyr protein kinase family. Ins receptor subfamily.
SIMILARITY: Contains 2 immunoglobulin-like C2-type domain SIMILARITY: Contains 2 leucine-rich (LRR) repeats.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    tyrosine phosphate.

SUBUNIT: Exists in a dynamic equilibrium between monomeric (low affinity) and dimeric (high affinity) structures (By similarity). SUBCELLULAR LOCATION: Type I membrane protein.

ALTERNATIVE PRODUCTS:

Event=Alternative splicing; Named isoforms=4;

Comment=Additional isoforms seem to exist;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 IsoId=Q16288-4; Sequence=VSP_002924; TISSUE SPECIFICITY: Widely expressed, tissue.                                                                                                                                                                                                                                                                                                              receptor subfamily.

SIMILARITY: Contains 2 immunoglobulin-like C2-type domains.

SIMILARITY: Contains 2 leucine-rich (LRR) repeats.

CAUTION: The additional kinase-deleted isoform TRKC-3 which replaces the kinase domain with 19 AA instead of 39 in the alpha-KD results from a frameshift.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               CATALYTIC ACTIVITY: ATP + a protein tyrosine = AD tyrosine phosphate.
SUBUNIT: Exists in a dynamic equilibrium between affinity) and dimeric (high affinity) structures.
SUBCELLULAR LOCATION: Type I membrane protein.

Dev. Brain Res. 75:235-252(1993).

FUNCTION: Receptor for neurotrophin-3 (NT-3). This is a tyrosine protein kinase receptor. Known substrates for the trk receptors are SHC1, PI-3 kinase and PLCG1. The KT and KD isoforms fail to stimulate transformation, process outgrowth or survival. Isoform KI25 exhibits tyrosine phosphorylation in the absence of ligand and is unable to mediate survival of neuronal cells.
                                                                                                                                                                                                                                                                                                                                                                                                                     intermediate levels in eye, heart, gut and muscle.Low levels found in kidney, liver, skin and yolk sac.

PTW: Ligand-mediated auto-phosphorylation (By similarity).

SIMILARITY: Belongs to the Tyr protein kinase family. Insulir
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  DEVELOPMENTAL STAGE: Expression occurs in the embryonal day 2 embryo with increasing levels later in development. In the E9 embryo highest levels are found in brain and spinal cord with

                    tyrosine phosphate.
SUBUNIT: Exists in a dynamic equilibrium between monomeric (low affinity) and dimeric (high affinity) structures.
SUBCELLULAR LOCATION: Type I membrane protein.
ALITERNATIVE PRODUCTS:
Event-alternative splicing; Named isoforms=8;
                                                                                                                                                                                                                    FUNCTION: Receptor for neurotrophin-3 (NTF3). This is a tyrosine-protein kinase receptor. Known substrates for the TRK receptors are SHC1, P1-3 kinase, and PLCG1. TrkC isoforms containing insertions within the kinase domain can autophosphorylate in response to NT-3, but cannot mediate downstream phenotypic
                                                                                                                                                                        responses.

brain-derived neurotrophic factor receptor precursor - chicken
N;Alternate names: receptor tyrosine kinase trkB
N;Contains: protein-tyrosine kinase (EC 2.7.1.112)
C;Species: Gallus gallus (chicken)
C;Date: 13-Jan-1995 #sequence revision 13-Jan-1995 #text_change 09-Jul-2004
C;Accession: S59939; \$42175; \$44098
R;Vinh, N.O.; Erdmann, K.S.; Heumann, R.
Gene 149, 383-384, 1994
A;Title: Cloning and sequence analysis of a cDNA encoding a novel truncated form of the A;Reference number: S5938; MUID:95047511; PMID:7959025
A;Accession: S5938

A;Status: preliminary; nucleic acid sequence not shown; translation not shown A;Molecule type: mRNA A;Residues: 1-818 <VIZ>

A;Cross-references: UNIPROT:Q91987; EMBL:X77251; NID:g563881; PIDN:CAA54468.1; PID:g4729, A;Note: the nucleotide sequence was submitted to the EMBL Data Library, January 1994, R;Dechant, G.; Biffo, S.; Okazawa, H.; Kolbeck, R.; Pottgiesser, J.; Barde, Y.A. Development 119, 545-558, 1993
A;Title: Expression and binding characteristics of the BDNF receptor chick trkB. A;Reference number: S42175; MUID:94116452; PMID:8287802
A;Status: preliminary

A; Molecule type: mRNA A; Residues: 1-818 < DEC>

Genetics: Cross-references: EMBL:X74109; NID:g407798; PIDN:CAA52210.1; PID:g407799

A;Gene: trkB C;Function: A;Description: regulation of nervous system development; receptor for brain-derived neuron A;Description: regulation of nervous system development; leucine-rich alpha-2-glycoproc;Superfamily: nerve growth factor receptor, high affinity; leucine-rich alpha-2-glycoproc;Superfamily: nerve growth factor receptor; alternative splicing; ATP; autophosphorylation; glycoprotein; growth factor receptor.
